A Best's Financial Strength Rating opinion addresses the relative ability of an insurer to meet its ongoing insurance obligations. It is not a warranty of a company's financial strength and ability to meet its obligations to policyholders. View our Important Notice: Best's Credit Ratings for a disclaimer notice and complete details at http://www.ambest.com/ratings/notice.

Data for Year-End 2021 from the life insurance companies' statutory annual statements. All dollar amounts are in thousands. All ratings shown are current as of May 16, 2022. Ratings are subject to change. This report is produced by VitalSigns, a product of EbixExchange USA.

Contract values are based on current cost of insurance and the current rate of return. This rate is 3.00%.

This supplemental report assumes that the currently illustrated nonguaranteed elements will continue unchanged for all years shown. This is not likely to occur, and actual results may be more or less favorable than those shown.

<sup>(1)</sup> NET ANNUAL OUTLAY = Annualized Premium + Unscheduled Premium - Partial Surrender - Annual Loan + Loan Repayment + Loan Interest (if paid) - Guideline force out.

<sup>(3,5,7)</sup> The Internal Rate of Return is the rate at which Outlays up to that year must be compounded each and every year to generate the Death Benefit, Contract Value or Surrender Value.

Contract values are based on current cost of insurance and the current rate of return. This rate is 3.00%.

This supplemental report assumes that the currently illustrated nonguaranteed elements will continue unchanged for all years shown. This is not likely to occur, and actual results may be more or less favorable than those shown.

<sup>(1)</sup> NET ANNUAL OUTLAY = Annualized Premium + Unscheduled Premium - Partial Surrender - Annual Loan + Loan Répayment + Loan Interest (if paid) - Guideline force out.

<sup>(3,5,7)</sup> The Internal Rate of Return is the rate at which Outlays up to that year must be compounded each and every year to generate the Death Benefit, Contract Value or Surrender Value.

Contract values are based on current cost of insurance and the current rate of return. This rate is 3.00%.

This supplemental report assumes that the currently illustrated nonguaranteed elements will continue unanged for all years shown. This is not likely to occur, and actual results may be more or less favorable than those shown.

<sup>(1)</sup> NET ANNUAL OUTLAY = Annualized Premium + Unscheduled Premium - Partial Surrender - Annual Loan + Loan Repayment + Loan Interest (if paid) - Guideline force out.

<sup>(3,5,7)</sup> The Internal Rate of Return is the rate at which Outlays up to that year must be compounded each and every year to generate the Death Benefit, Contract Value or Surrender Value.

(1) NET ANNUAL OUTLAY = Annualized Premium + Unscheduled Premium - Partial Surrender - Annual Loan + Loan Repayment + Loan Interest (if paid) - Guideline force out.

(3,5,7) The Internal Rate of Return is the rate at which Outlays up to that year must be compounded each and every year to generate the Death Benefit, Contract Value or Surrender Value.

Contract values are based on current cost of insurance and the current rate of return. This rate is 3.00%.

This supplemental report assumes that the currently illustrated nonguaranteed elements will continue unchanged for all years shown. This is not likely to occur, and actual results may be more or less favorable than those showpage 15

<sup>\*</sup>This illustration reflects the dividend option of Paid-Up Additions. Non-guaranteed values include dividends, which are neither estimates nor guarantees, but are based on the 2019 dividend schedule. The dividend schedule is reviewed annually and it is likely that dividends in future years will be lower or higher depending on the Company's actual experience. For this reason, we strongly recommend that you look at a hypothetical lower schedule illustration available upon request.

<sup>\*</sup>This illustration reflects the dividend option of Paid-Up Additions. Non-guaranteed values include dividends, which are neither estimates nor guarantees, but are based on the 2019 dividend schedule. The dividend schedule is reviewed annually and it is likely that dividends in future years will be lower or higher depending on the Company's actual experience. For this reason, we strongly recommend that you look at a hypothetical lower schedule illustration available upon request.

Refer to the Narrative Summary for assumptions, explanations and additional information.

The Internal Rate of Return is a measure that can be used to evaluate performance and is based on the current dividend schedule. It is the amount at which outlays (out-of-pocket costs) up to that year must be compounded at each and every year to generate the Net Death Benefit. For example, you would have to earn 4.81% on your investment in order to equal the Net Death Benefit from the proposed Whole Life Legacy 100 over 81 years.

\*This illustration reflects the dividend option of Paid-Up Additions. Non-guaranteed values include dividends, which are neither estimates nor guarantees, but are based on the 2019 dividend schedule. The dividend schedule is reviewed annually and it is likely that dividends in future years will be lower or higher depending on the Company's actual experience. For this reason, we strongly recommend that you look at a hypothetical lower schedule illustration available upon request.

|      |                               |  |  |   |

The Internal Rate of Return is a measure that can be used to evaluate performance and is based on the current dividend schedule. It is the amount at which outlays (out-of-pocket costs) up to that year must be compounded at each and every year to generate the Net Death Benefit. For example, you would have to earn 4.81% on your investment in order to equal the Net Death Benefit from the proposed Whole Life Legacy 100 over 81 years.

\*This illustration reflects the dividend option of Paid-Up Additions. Non-guaranteed values include dividends, which are neither estimates nor guarantees, but are based on the 2019 dividend schedule. The dividend schedule is reviewed annually and it is likely that dividends in future years will be lower or higher depending on the Company's actual experience. For this reason, we strongly recommend that you look at a hypothetical lower schedule illustration available upon request.

\*This illustration reflects the dividend option of Paid-Up Additions. Non-guaranteed values include dividends, which are neither estimates nor guarantees, but are based on the 2019 dividend schedule. The dividend schedule is reviewed annually and it is likely that dividends in future years will be lower or higher depending on the Company's actual experience. For this reason, we strongly recommend that you look at a hypothetical lower schedule illustration available upon request.

\*This illustration reflects the dividend option of Paid-Up Additions. Non-guaranteed values include dividends, which are neither estimates nor guarantees, but are based on the 2019 dividend schedule. The dividend schedule is reviewed annually and it is likely that dividends in future years will be lower or higher depending on the Company's actual experience. For this reason, we strongly recommend that you look at a hypothetical lower schedule illustration available upon request.

Refer to the Narrative Summary for assumptions, explanations and additional information. This illustration is not valid unless accompanied by or preceded by a Basic Life Insurance Illustration dated 07/15/2019. Refer to the Basic Life Insurance Illustration for guaranteed elements and other important information.

<sup>\*</sup>This illustration reflects the dividend option of Paid-Up Additions. Non-guaranteed values include dividends, which are neither estimates nor guarantees, but are based on the 2019 dividend schedule. The dividend schedule is reviewed annually and it is likely that dividends in future years will be lower or higher depending on the Company's actual experience. For this reason, we strongly recommend that you look at a hypothetical lower schedule illustration available upon request.

Non-guaranteed results shown on this report are based on hypothetical rates of return and current charges. For additional non-guaranteed results based on different sets of assumptions, see the **Alternate Values report**.

#### **Requested Portfolio Allocation**

The values shown here, including Annual Contract Outlay, are not guaranteed. This report assumes that the net premiums have been allocated to the options requested.

#### Non-Guaranteed Results Based on Hypothetical Annual Gross Returns of 7.00% (Net 6.59%) @ and Current Charges

### Paying a Premium Early on a Guaranteed Universal Life Contract

#### Can you lose the guarantee on a lifetime death benefit?

#### **EXAMPLE:**

The Annual Premium is \$20,000 and was due on 02/04/23. The Premium was paid on 2/04/23.

Target Premium is \$26,000.

Commission is 50% of the Target Premium or Annual Premium paid, whichever is less.

Year 2 renewal premium is due 2/04/24, and \$10,000 is paid on 1/31/24.

Policy Number:

Issue Date: 01/03/2007

Protection VUL Form: 05PROVUL

Presented By: Home Office - MC

Current Death Benefit \$1,500,000 Current Base Face Amount \$1,500,000

Billing Mode: Annual

Death Benefit Option 1; Cash Value Accumulation Test

State: New York

Assuming Maximum Charges and an Initial Gross Rate of 6.00% (Net 5.72%)

rates of return may be higher or lower than those illustrated and will fluctuate in response to changing market conditions and the allocation chosen among subaccounts and any fixed account options. In determining the net rate, this illustration assumes 0.28% total portfolio annual expenses based on the specified Subaccount Allocation shown on the Summary Page. The Subaccount Allocation displayed may not reflect the current allocation under your policy. Please contact your representative for information on the current allocation. This hypothetical illustration does not reflect investment, if any, in the Fixed Account.

Each of the Lifestyle funds is a "fund-of funds" that invest in other underlying funds. To maintain target allocations for each Lifestyle fund, the underlying funds may be rebalanced periodically. The "Total Portfolio Annual Expenses" for each Lifestyle fund listed below include fees and expenses incurred indirectly as a result of its investment in these underlying funds and are based on target allocations as of July 1, 2015. Underlying Fund Fees and Expenses are estimated. Actual amounts are based on the current fiscal year for the Lifestyle funds.

#### SubAccount and Fixed Account Options Allocation

Actual charges assessed against each subaccount and fixed account options vary as follows:

Total Portfolio Annual Expenses

Conservative

Money Market B

0.28%

#### Premiums

This illustration assumes that planned premiums are paid at the beginning of each modal period indicated. Based on the following assumptions in this illustration, additional premiums would be required to maintain policy benefits starting in the specified year:

| Assumptions                      | Year |
|----------------------------------|------|
| Maximum Charges/6.00% Gross Rate | 31   |
| Maximum Charges/0.00% Gross Rate | 26   |

Payments in excess of the planned premiums are subject to underwriting approval.

#### Premium Charge

Premium Charge of 8% of premium will be deducted from each premium for the first 5 years and 2% of premium will be deducted from each premium for policy years 6 and later. The maximum premium charge is 8% in all years.

#### Monthly Administrative Charge

Monthly Administrative Charge of \$15 in all policy years, current and guaranteed.

#### **Base Face Amount Charge**

Base Face Amount Charge is an additional \$0.0644 per \$1,000 of Base Face Amount per policy month. It will be deducted for the first four policy years. A separate per \$1,000 Base Face Amount Charge will be deducted for the first four policy years of any face increase. This charge varies by age, sex, and risk class.

#### Cost of Insurance

Current insurance charges are based on company experience. The current rates may change, but are guaranteed never to exceed the maximum rates.

Maximum rates reflect the 2001 CSO Mortality Table.

#### **Asset Based Risk Charge**

A charge to cover the risk of adverse mortality and expense is deducted monthly from the Policy Value. The charge is a percentage of that portion of your Policy Value allocated to variable investment options. The current percentages on the policy value allocated to the variable investment options are 0.075% for the policy years 1 to 15 on current and guaranteed basis, 0.000% on current basis and 0.020% on guaranteed basis thereafter for all policy years.

#### Gain or Loss/Interest Credited

This is the investment gain/loss on the Policy Value based on the rate of return of your policy's investment options selected or the interest credited on the Fixed

# Life How An Index Account Works

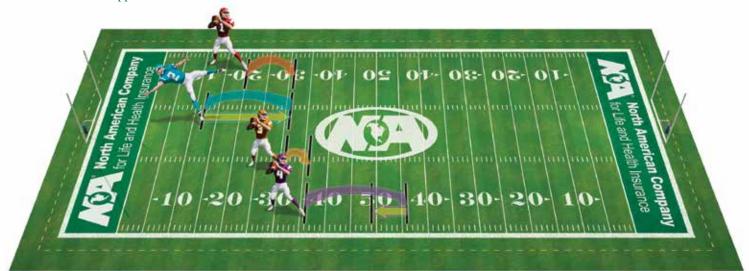

Indexed Universal Life Insurance provides two main advantages: death benefit protection and an Index Account that protects your premium payments from losses with a zero percent floor. Here's an example of how the Index Account works in simple terms.

#### RULES OF THE GAME

If the Index Account were a game of football, here's how the rules would change:

Perpetual first down. No negative yards. Gain up to a maximum of 13 yards per play.

Take a look at what happens with these "new rules."

#### THE PLAY-BY-PLAY

Pick your favorite quarterback. His team has the ball and is starting out on the 20 yard line.

- Play 1: Your quarterback throws for an 11-yard gain! The ball is spotted at the 31 yard line.
- Play 2: Your quarterback is sacked at the 12 yard line for a 19-yard loss. But we've changed the rules so that instead of losing yards, the ball is spotted at the 31 yard line where the play began, and it's still first down.
- Play 3: Your quarterback throws for a five-yard gain. The ball is spotted at the 36 yard line, and it's still first down.
- Play 4: Your quarterback throws for a 20-yard gain. The 13-yard maximum kicks in, so your team has to "give back" seven of the yards. The net result is a gain of 13 yards, and the ball is spotted squarely on the 49 yard line.

#### GAME SUMMARY:

Under normal rules, the team would have gained a total of 17 yards (gains of 11, 5, and 20 with a loss of 19 yards) and the ball would have been spotted at the 37 yard line. However, with the new rules, the team gained 30 yards and the ball is at the 49, which is an extra 12 yards downfield!

#### WHAT DOES THIS MEAN FOR YOU?

Replace your football team with any Index Selection currently available. Each play is a year, and the yardage gains are locked-in interest rate credit gains!

The information presented is hypothetical and not intended to project or predict investment results.

Indexed Universal Life products are not an investment in the "market" or in the applicable index and are subject to all policy fees and charges normally associated with most universal life insurance.

Failure to meet premium requirements may result in a lapse in the policy and participation in the Index Accounts. The Index Accounts are subject to caps and participation rates. The surrender charge varies by product, gender, issue age, underwriting class and duration. In no case will the interest credited be less than 0 percent. Please refer to the customized illustration provided by your agent for additional detail. The policy's death benefit is paid upon the death of the insured. The policy does not continue to accumulate cash value and excess interest after the insured's death. The policy does not continue to accumulate cash value and excess interest after the insured's death. For costs and complete details, call or write North American Company, Administrative Office, Sioux Falls, SD 57193. Telephone (877) 872-0757.

# Nationwide Acceleration of Life Insurance Death Benefit for Qualified Long-Term Care Services Rider Benefit Report

#### **ALIDB for Qualified Long-Term Care Services Rider Benefit**

- The ALIDB for Qualified Long-Term Care Services Rider is intended to be a qualified long term contract under section 7702B of the Internal Revenue Code.
- You will receive the lesser of: 2% per month of the base specified amount (not including any Additional Term Rider specified amount), OR the per diem amount allowed by HIPAA for the given year time days in the month.
- If collecting the per diem rate allowed by HIPAA, your monthly benefit will increase each year with any
  increase in the HIPAA per diem rate until reaching the maximum monthly benefit amount issued.
- The benefit will last at least 50 months (longer if receiving benefit based on HIPAA rate) assuming no withdrawals or loans have been taken that could reduce benefits.
- During the benefit period the ALIDB for Qualified Long-Term Care Services Rider charges will be waived but other charges will continue to be deducted subject to the No Lapse Guarantee described below.
- This ALIDB for Qualified Long-Term Care Services Rider also provides a one-time, lump sum benefit as an
  acceleration of the death benefit under the base policy whenever qualifying terminal illness conditions have
  been met. The rider defines terminal illness as an illness or physical condition, including a physical injury,
  that can reasonably be expected to result in death within 12 months.

#### **Indemnity-style Benefit**

Once qualifications for Qualified Long-Term Care Services have been met, the ALIDB for Qualified Long-Term Care Services Rider benefit will be paid directly to the owner of the contract on a monthly basis. No monthly bills or receipts will need to be submitted. Excess benefits not needed for Qualified Long-Term Care expenses may be used for other purposes.

# **Qualified Long-Term Care Services under the ALIDB for Qualified Long-Term Care Services Rider** include:

- Nursing Home Care
- Home Health Care and Hospice
- Assisted Living
- Adult Day Care

#### **No Lapse Guarantee**

If the cash value is insufficient to cover monthly deductions while the Insured is collecting ALIDB for Qualified Long-Term Care Services Rider Benefits for any qualified service, we will not lapse the policy and monthly deductions will be waived. Withdrawals and loans may not be taken while receiving the ALIDB for Qualified Long-Term Care Services Rider Benefit. Additionally, we will not lapse the Policy within 12 months of paying a Lump Sum Benefit.

#### **Terminal Illness Benefit**

An acceleration of death benefit for terminal illness is available when certified by a licensed health care practitioner that the insured has 12 months or less to live. The maximum lump sum benefit amount is \$50,000.
